

ΕΦΗΜΕΡΙΣ: 9
OR
A DIARY

{ ASTRONOMICAL }
And
{ ASTROLOGICAL }

For the Year of Grace 1661.

ATTENDED ON

With a Micro-Chron of the most Remarkable
Accidents that have happened in *England*,
since the Year 1640.

And an Astrological Judgement upon the great
Eclipse of the Sun, *March 20.* and the Sun's
Ingresses, &c. Discovering what the Stars
portend to the Inhabitants of this Northern
Clime, the ensuing Year.

With several other Things of useful Consequence.

By JOHN GADBURY, φιλομαθηματικός.

*Astrologia altissima Scientiarum est, tum quia de Cælestibus,
tum quia de futuris, quorum Scientia, non solum Divina est,
sed etiam utilissima. Card. Seg. 1. Aph. 20.*

London, Printed by James Cottrel, for the
Company of Stationers. 1661.

TO THE
TRULY HONOURABLE,
AND
Perfect Pattern of LOYALTY,
Sir Jeffery Palmer

Knight and Baronet,
His Majesties Attorney-General :

JOHN GADBURY

Wisheth all TERRENE and ETERNAL

HAPPINESS;

AND

Humbly Presents his DEVOTIONS
IN THE

DEDICATION

Of these his

ASTRONOMICAL

GOD SAVE THE KING !

When Oliver, Protector was proclaim'd,
The People mus'd to hear the Monster nam'd:
And when He pass'd through th' City, Men did stare!
Some asking, *What's He?* Others, *Who goes there?*
But when we did proclaim Our Sov'raign KING,
The Streets were all on Flames; The Bells did ring:
All sorts of Men, to sing VIVE LE ROY,
Did spoil their Hats, and tear their Throats, for Joy!

A

A Table of Terms for this year 1661.

Could Men but quiet be, there were no need
Of Terms! to make their boyling Purges bleed.

| Return Days, or Days of Bliyn. | Days of Exception | Return Brevisum. | Days of Appea- rance. |
|-----------------------------------|----------------------|---------------------|--------------------------|

| Quind. Mart. Nov. 25 | Novem. 26 | Novem. 27 | November 22 |

And why t'ward Lawyers should we bend our Ire?
Since we our selves so fiercely blow the fire
That consumes one another. Or rather, why
Do we not blame the Jury's Perjury?
For one [sometimes] will lib' Rest [with's Reason] serve,
Before from's Resolution he will lwerve.
Thus have I seen a Jury [often] do
What Court and Justice ne'er consented to.

January hath xxxi dayes.

Be gone, ye Tatter'd Times! that Men undo;
Both Prince and Priest; The Lords and Commons too!
A Noble Soul should never mourn to see
Brave Men condemn'd to Clean-Teeth-Destiny!
Since GOD and Nature sets a term to Things;
And treads on them that lately scorn'd their KINGS.

February hath xxviii dayes.

The *Allions* of this *Month*, are like the *Air*;
They're cloudy sometimes, and at others, fair.
Grim *Chonius* squares the *Sun*, and *Mercury*;
Which raileth *Boreas* forty-fathom high!
But *Jove* and *Venus* Aspects do abate
The violence of *Saturn* rigid here.

March hath xxxi days.

The *Starcem* quarrel; and from *Mavor's* Brow,
Dire Aspects threaten fullen *Saturn* too;
 And winged *Hermes* (in the House of *Mars*)
 Bids *Jove* defiance, at the *Verbal* wars!
 So have I known *Land Tongues* delude the *Sense*,
 And rob *Right Reason* of its *Reverence*.

April hath xxx dayes.

Have crawling backward in Cytherea's Chair,
Opposes her: (his kinde Disposer!)
Not so content, he spits his Venom at
Triumphant Mars! his honour to abate.

Thus Zealous bolts by th' arm of Flesh inherit,
What they cannot accomplish by the Spirit.

May hath xxxi dayes.

Retrograde Chronus in the Scorpion,
 Last Month belch'd out his Fury on the Sun;
 And now, assuming his prodigious Ire,
 Prepares to cast forth fresh darts of his Fire
 Upon the Two inferiours: But Jove's Trine;
 His boundless Malice helps to Counter-Mine.

June hath xxx dayes.

The *Evangel* Stars (this Month) at Parley are;
And question strongly, whether *Crucel-war*
Or *Peace* be *safest*? *Jove* lies President,
And pleads for *Peace*, until his breath's nigh spent.
But *Saturn* *Vows* [and so doth angry *Mars*]
Be't right or wrong, to kindle private *Jars*.

July hath xxxi days.

Good Aspects bring good Air: and Venus now,
Smiling on Mars, foretels it to be so.
But towards the end, the Planets diff'rent Frowns,
P'efage ill weather, on the self-same grounds.
But that's not all; if th' Air corrupted be,
Mankind living by it, Pray what then shall be?

August hath xxxi dayes.

Ine last time Regat Mayors did pass by
Great London's true Ascendent, Gemini;
Her Gairs, Polls, Chains, and Aldermen (we know)
Did to the Sword and Mace mildly bow:
He's come again there, Mischiefs great to bring:
Let's pray that London, now, escape his sting.

September hath xxx days.

The season's calm; and *Berms Glu'ring Chain*
Is lately broke: Here's no *impetuous Rain*
To hinder seed-time: the greater Pow'rs above,
Presents us with a Face of *Peace and Love*.
But what are men the better, when *Sol's Square*
With *Angry Mars*, makes *Plenty* prove a snare?

October hath xxxi days.

The Square of Stubborn with Ambitious Mairs,
Set's Knives on work to kindle Private Jars:
And did not Jove transform fly Archa's brow,
Oh! how would men be Lillified now?
Look to't, Trappanners! for the Stars decree,
(Against your Allions) Thundering Misery.

November hath xxx dayes.

Is't so indeed, flowt Mayors! dost thou bow?
 Can't Phœbus Time, prevent thy flagg'ring now?
 Will not thy sword hold edge? Shall a Committee
 Prove thy Superior, drawn from out the City,
 That (lately) thou didst govern? 'T must be so;
 The Present Brains above the Hand, ye know.

A

The State of the Year predicted.

THe Sun enters the Vernal Æquinoctial signe *Aries*, this year, on Saturday, March 9. 20 h. 40 m. P. M. in the Meridian of London; and the Figure of Heaven, is, at that *punctum temporis*, as is here presented.

In this Figure, the benevolent Planet *Jupiter*, is Lord of the Ascendent, and in Sextile thereunto, from the M. C. being also in a strong reception of his Dispositrix, the fortunate Planet *Venus*, portending ———

The State of the Year predicted.

The Prince and People to unite in one,
And make a nobler Reformation,
Then twenty years pretences could invent,
By th^e State, Protector, or Long Parliament!
That Law shall flourish, and the Gospel too;
And Schooles enjoy that honour is their due.
Each Grand Contest will soon appeased be,
And England find her Sou'raign Remedy;
Maugre all high-orb'd Malice, which doth lurk
In private bow, Clandestine Plots to work.

Now, let the Politician tell me, whether Astrologie be a vain and useless Study. How comes it to pass, that *Machiavil* is out-witted; or that multitudes and swarms of people can be overcome, without the use of *curly-brand*? Who could have believed, that so happy and eminent a Turn could have happened among us, without the assistance the Syderial Science affords? I esteem it no miracle for States to turn to ruine by the strenuous breath of Fate; nor for Parliaments to be subject to the force and rebellious actions of their own servants. We now by experience find, *Malum Principium, malus finis sequitur*; and that there is more of Destiny in all mundane Affairs, then men generally are willing to believe. The Physician cannot keep his own head from aking; nor can the Lawyer ascertain his own cause; be it never so just, a sullen Jury-man (*si fortuna volet*) can turn the scales, and force him to a Writ of Errour. The Politick Merchant, although he traffick never so warily, and to the greatest advantage imaginable, yet cannot avoid the running on the cruel Rock of Ruine, that an unfortunate Factor is Author of. Nay, the Astrologer himself cannot baffle the force of an evil Direction in his own Nativity, by the foreknowledge thereof: for, if he could, he were somewhat more then man. *Et sic in aliis.*

Yet let not the ingenious Reader mis understand me: for although it be most certain and true, that man cannot alter or add to Gods and Natures Decrees; yet, I assert such an All-sufficiency in God, that he may (although he seldome doth) alter them, and turn them into a contrary current.

God, the great God of heaven, sometimes delights,
From top to toe, to alter Natures Rites.
If, as the Learned *Thales* saith, that Nature is *Ποινα γὰρ ἀνθρώπων*

Du-Barr.
fol. 16.

The State of the Year predicted.

Now, the workmanship of God, then may God (*ad libitum*) withdraw his concurrency from Nature, or the chain of second Causes, and leave them passive, as at the first. For, it is not Natures, but Gods power that is Autocratorical; and as he is Lord of all, so he keeps the operations and influences of all second Causes in his hands.

Summer begins always when the Sun entereth the first point of the Tropick Cancer; and this year it happens on *D, Jan. 10. 1. h. 26 m. P.M.* the Coelestial Twins ascend then on the Eastern Finitor; the two Inferiours nearly conjoin'd therein: the Malefiques, Saturn and Mars, are both applying to an Opposition, from the twelfth and sixth Houses of the Figure &c. —

*Threatning imprisonment, and other things,
which heretofore have been the Lots of Kings.*

Autumn commenceth this year on *U, September 12. 6 h. 39 m. P.M.* the Regal signe Aries is then Horoscopical, and Capricorn mediates Heaven; the Luminaries are going to Conjunction, and Mars casts a malignant Opposition to the tenth House, &c. from Cancer his fall, and exaltation of Jupiter.

*Forbear, ye Hot-brain'd Saintlings! Let your hands
Be sanctified from blood; then make demands
Unto your Sov'raign for that Liberty
Is the just Guerdon of your Loyalty.
'Tis dangerous for any man to strive
Against that Power, which keeps him alive.*

Winter begins this year on *J, December 10. 18 h. 17 m. P.M.* the Sun at that time entering Capricorn: the Figure is nearly the same with that of the Spring-Quarter. Saturn hath just changed his War-like Castle, for a Religious Palace: he hath rejected Mars, and chosen Jupiter his Guardian; and intends another Conjunction with Jupiter shortly in his own house. As Sects, Schisms, Heresies, and strange Whimsical Tenents; have had their beginning from a Conjunction of Saturn and Jupiter in Pisces, a false, treacherous and dissembling signe; and the grave Bishops (and a splendid Church-Government) their fatal Stroke: so from the Conjunction of the same Planets in Sagittary, a Kingly and Imperial signe, may the Wheel turn round again, and Bishops, &c. with an orderly de-

The State of the Year predicted.

demeanour in things Ecclesiastical, arise; and all our former leivious humours and fancies suffer a perpetual *D. liquum*. Nay, so well shall we, upon the effects of that Conjunction, be rid of all Confusion, that Frenzies and Enthusiasms, and *Ex-tempore* Nonsense, shall not pass for Canonical!

Men may twattle and boast of Liberty, and of enjoyment of a freedom in things pertaining to Conscience and Religion; but what have they enjoyed (setting their disorder and confusion aside) more then they did in the Bishops days? Had not men better be subject to the Cope and surplice of a Learned Episcopist, then to the pye-bald Garmes of a Lay Elder? Let us but lay the beginning, middle, and end together, and then consider what we have gained by our many years differences to boast of.

I remember to have heard a story of a conceited souldier, who being with his Company, when a exercising, was so regardless of the Word of Command, that in stead of yielding obedience thereunto, (as others) stuck his Pike in the Ground, and minded only his Pipe of Tobacco: his Captain perceiving him thus neglective, began to remind him of his duty with a Cane about his shoulders: then the peaceable souldier betook himself to his Arms, like the rest, and did his postures as well as any; until at the last, the word of command came, As ye were: he then betook himself to his old posture again, with his Pike on the ground, and Pipe in his mouth, and rencountred his Officer with this sudden, y. t. merry repartee, I ony — Look you now, Sir, (said he) what is it that we have done by our bustling and quartering? had we not as good a stood still all this while? — I shall leave every man to make his own Application hereof; and end my Discourse of the Ingresses this year.

Of the Eclipses this Year.

There will be four Eclipses this year; two of the Sun, and two of the Moon: two of which will be visible in England.

The first will be a conspicuous defect of the Sun, on Wednesday, *March 20. 37 m.* past nine in the morning; and will be visible to all Europe: take the beginning, end, duration, &c. as my worthy Friend Mr. Wing hath it in his second part of his Ephemeris-----

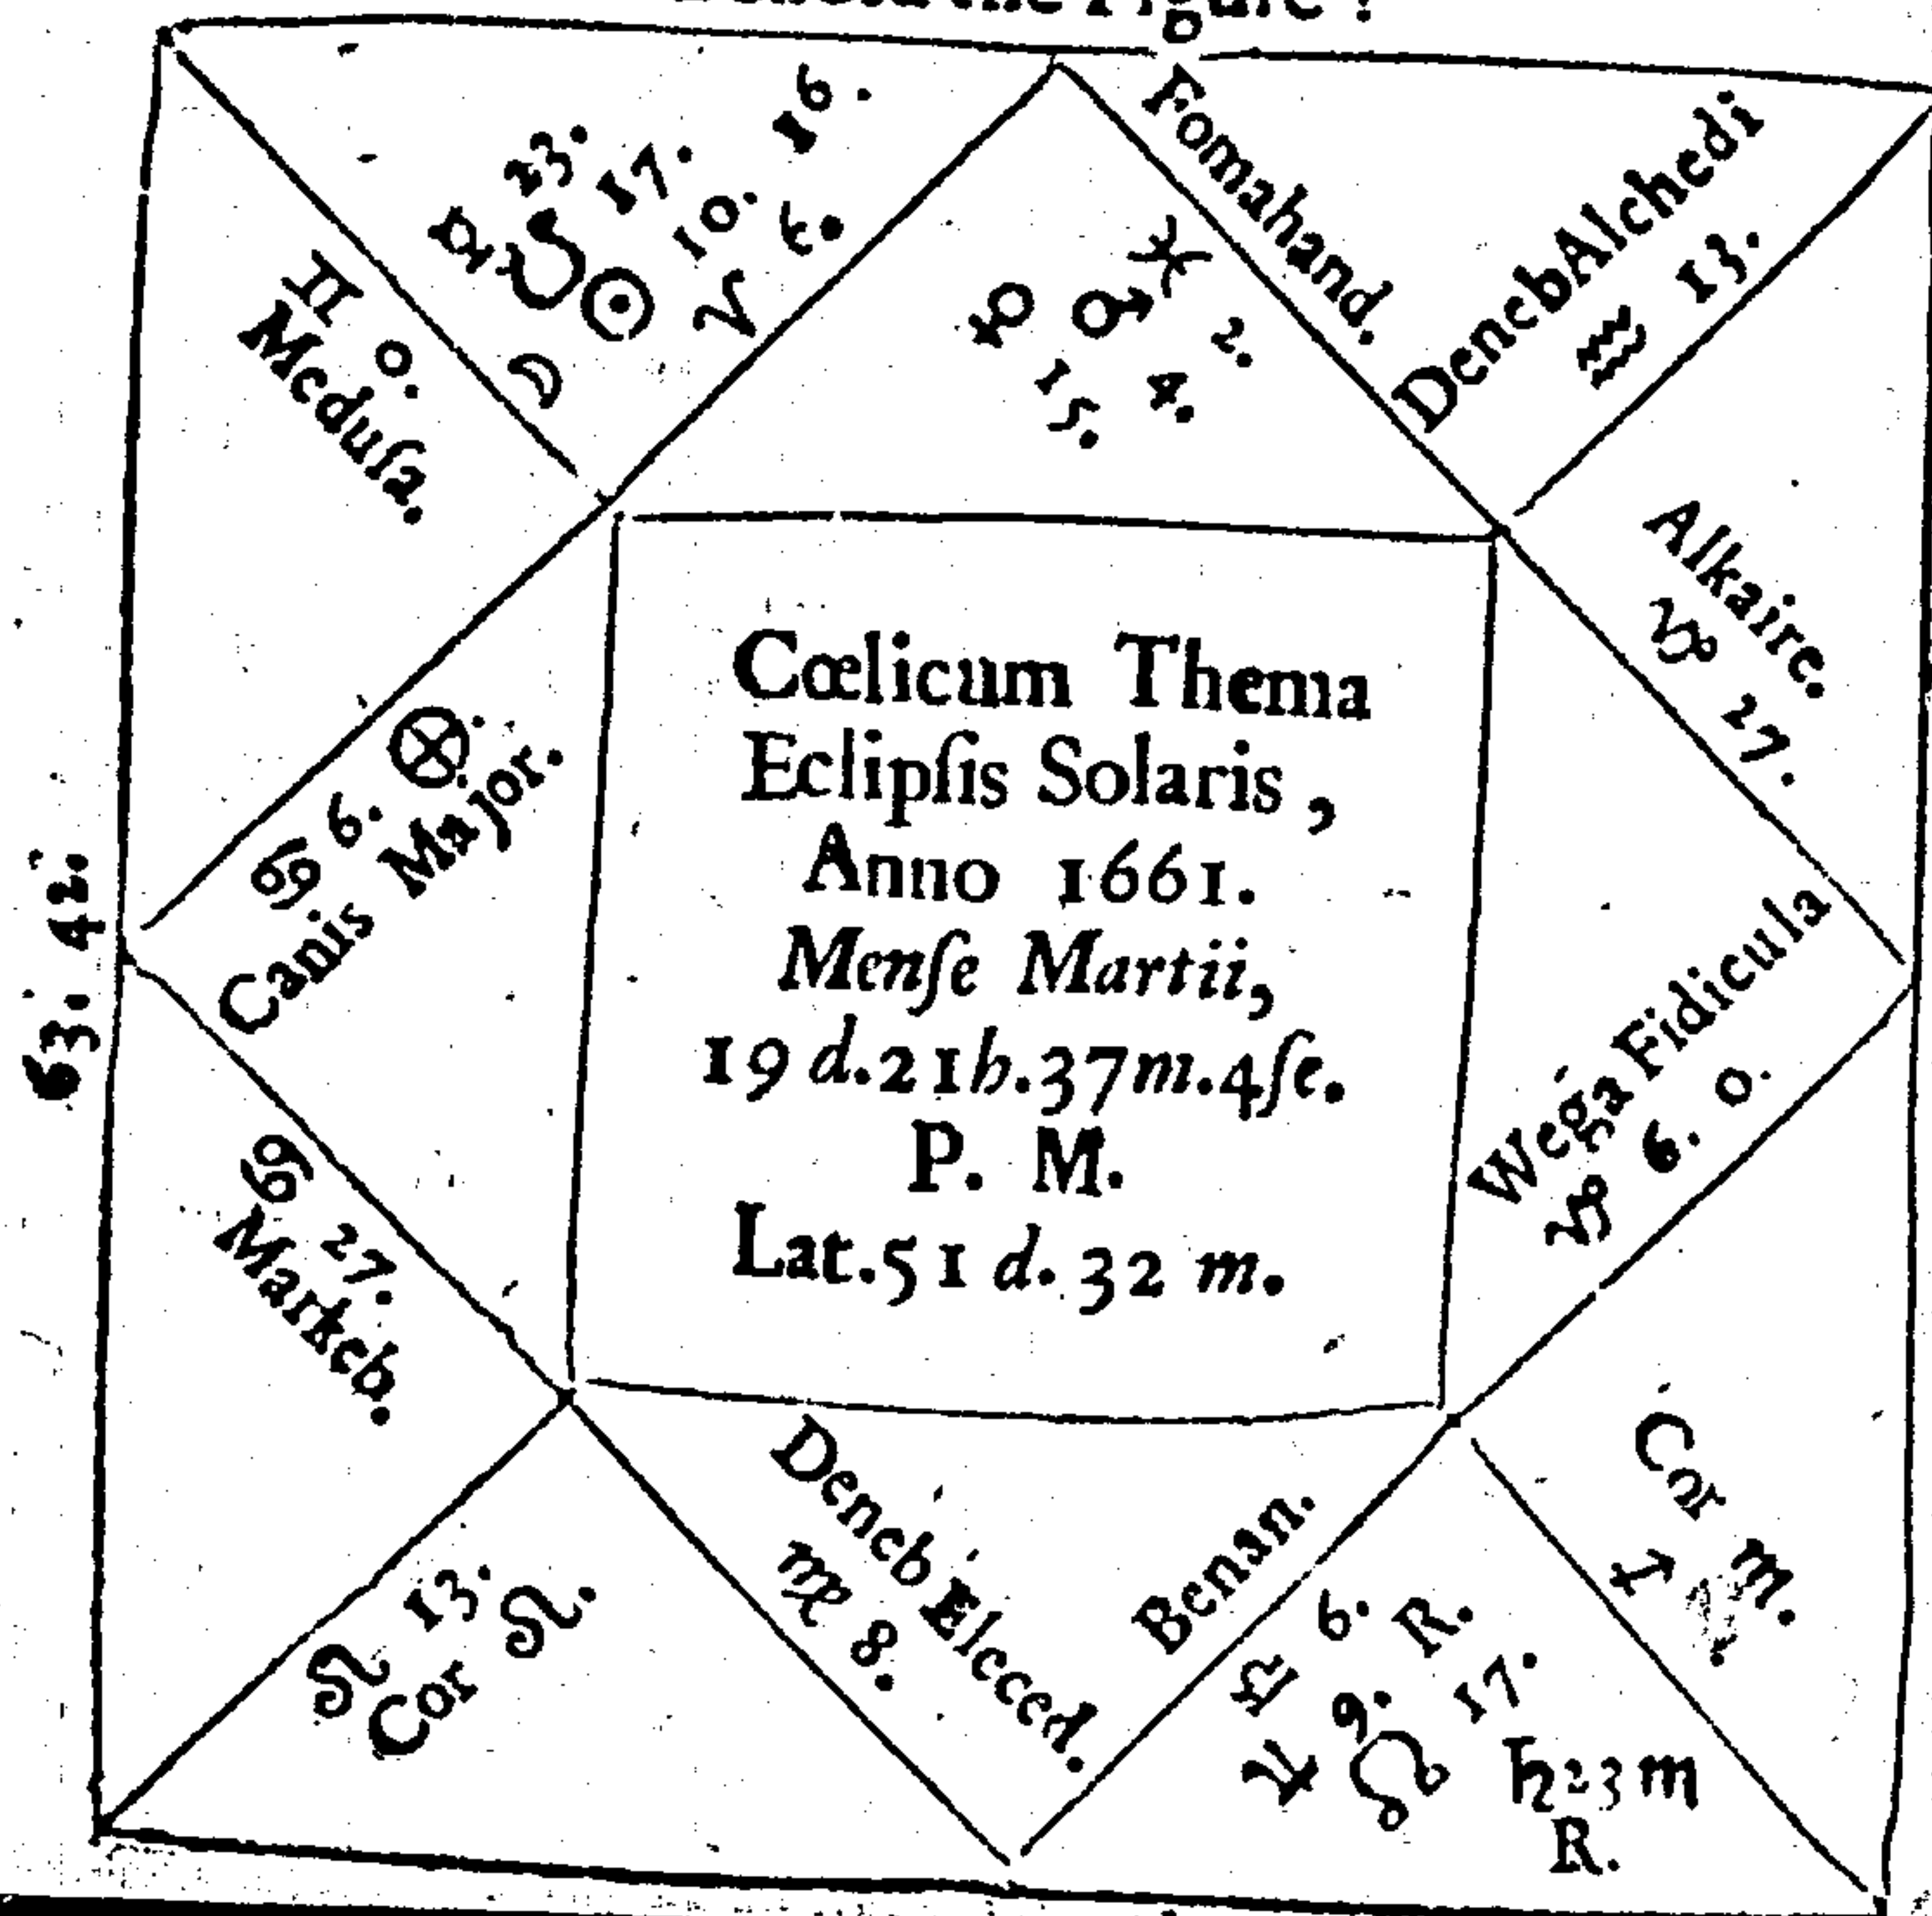

The State of the Year predicted.

| | | | | | |
|--------------------|---------------------|-----|-----|------|------------------|
| March 19. 1661. | Beginning at | h. | m. | sec. | Post Meridiem |
| | Middle of it | 20. | 34. | 34.2 | |
| | Visible Conjunction | 21. | 37. | 4.3 | |
| | End of it at | 21. | 39. | 31.2 | |
| | Total Duration | 22. | 39. | 38.5 | |
| | Digits Eclipsed | 1. | 5. | 8.2 | |

| Summa totius addenda | 423. | 42. |
| Aufer totum Circulum | 360. | 0. |
| Asc. Obliqua primæ domus | 63. | 42. |

Behold the Figure!

The State of the Year predicted.

The Learned Ptolemy in his Cent. Aphor. 86. saith, *Sol est fons vitalis potentia*, *Luna Naturalis*: The Sun is the Fountain of Vital power, the Moon of Natural. The Learned Peucer saith the same... *Est enim Sol ☉ & ☿, fons vitalis; Luna ☾ & ♀, Naturalis facultatis*, &c. which if true, (as there is no doubt reasonably to be made thereof) then a defect of either, must necessarily prove obnoxious, not only to Vegetables, &c. but mankind also. For when the vigour of the Beams of Light are withheld, the earth cannot fructify and produce its effects so fully and conveniently as at other times: Hence Vegetables want their strength and nourishment, and mankind meets with Diseases. Thus also it cometh to pass, that those years in which there are most Eclipses, there are the greatest droughts, and consequently the most dangerous Diseases reigning upon the sad influences of an Eclipse of the Sun. Hear how the Learned Peucer interrogates... *Quantos in cendit aestus quamdiu flagrant, Solis sub Ariete, Anno quadragessimo? Quos motus in Orbe Terrarum commovit, cum hac Solis, tum altero Anno post Lunæ Eclipsis? Næ ex illis & propagata sunt Semina malorum omnium, quæ nunc cum nostras urgeant cervices, & vitæ fortunæq; minuentur, immo intentent atq; inferant perniciem, evidentius sentimus & serimus ac deploramus acerbius. Quas lites, quam superba dissidia, & occulta odia, infidiasq; quam violenta consilia severint struxerintq; quæ bella indixerint, quæ pericula nocumenta que frumento fructibusq; crearent, deliqua anni quadragessimi quarti, cum Luna tota, atra caligine, ter sedum in modum deformaretur? Sol plus de unce sui Orbis obscuraretur, adeo, ut in quibusdam locis interdum stellæ illuxerint, ac conspicerentur: eo ipso, & sequentibus annis, ex eventu didicimus.* Casp. Peuc. fol 661. de Astrolog.

And although there are some who (weakly) maintain, that Eclipses have no more influence upon Terrene bodies, than the black-fac'd Night; yet, they cannot deny, that the one is natural and ordinary, the other prodigious and extraordinary: and that their effects are as different as their Natures. Nay, they that quarrel most against the influences of such obscurities and defects, cannot anticipate the effects thereby portended, in either their own or friends Nativity.

The Diurnal motion of the earth, (or Sun, if people will have it so) is such, that there is a most apparent Physical Reason to be rendered of the common and never-failing inter-course

The State of the Year predicted.

course of Day and Night. But Eclipses happening in no such order, and at no such certainty (*in respectu temporis*) clearly demonstrate the night less valid and efficacious, then these: the one coming to pass by a constant and unalterable Law and Edict of Nature; the other happening by Natures Decrees also, but at no such certain, distinct, and determinate time.

Were Eclipses as certain to happen, as is the Night, (I mean, when the same reason in Nature is afforded) then should we have Eclipses of both Lights monthly. For, if we consider that the Sun is eclipsed onely in his Synod, or Conjunction with the Moon; and the Moon suffers an Obscuration when she is diametrically opposed to the Sun: we must conclude the cause of the Suns Eclipse to be the interposition of the Moon betwixt him and the earth; and the cause of the Moons Eclipse, the interposition of the earth betwixt her body and the Sun. Now, we know that there is not a moneth passeth us, but affordeth a New and Full Moon; yet we may be six months and more, sometimes, without an Eclipse of either: Ergo, Eclipses are of far greater signification then the enemies to Astrologic are aware of; whose ignorance therein would make them of one and the same influence with the necessary darkness and obscurity of the night.

The natural privation of light in the night, is (in its kind) of as good use unto all things sublunary, as the splendour and beauty of the day; and is as necessarily opposed thereunto, as the siccity and calidity of the Summer and Autumn, to the humidity and frigidty of the Spring and Winter. But as it must be destructive to the being of all Vegetables, to have two Summers in a year, when one is of sufficient force to ripen all that one Spring can produce; so must it needs be contrary to the encrease and nourishment of the seminal Vertues of all Terrene Productions, to have a double night; or in the stead of one, a night and a half, when as one singly is endowed with vigour enough to concoct and allay the heat of bright *Phæbus's* scorching Rays, that one day affords.

And if it be lawful to argue a *à posteriore*, I shall then add, it is considerably eminent, that Eclipses have not onely been deemed terrible, but the certain *prædictum* of great and notable Mutations in the world. So astonishing was that eminent Eclipse at the death of our Saviour, that the sight thereof caus-

The Stat of the Year predicted.

ed *Dionysius Arcopagus*, to cry out, *Aut Mundi Anticipationem pati, &c.* That either the God of Nature suffered, or else the Fabrick of the whole world should be destroyed. Alexander, as it is reported by *Arrian. Hist. Lib. 3.* sacrificed to the Sun, Moon, and Earth, to divert the evil he dreaded an Eclipse to portend him, that a little before had happened. Nay, History acquaints us, that at the sight of Eclipses of the Sun and Moon, the whole Armies of *Pericles*, and *Salpiti*, were stricken with fear and amazement.

I could instance in infinite examples of this kind; as the Translation of the Persian Monarchy, *Anno Mundi 1631.* which was eminently pre-signified by the Moon her being totally eclipsed but a short time before: but I forbear. Onely let us remember, that the famous and memorable Eclipse of the Sun on *March 29. 1651.* in the very degree of his exaltation, poured down its influences so violently and cruelly upon Europe, that it set all Nations therein, into a confusion. Nor hath that eminent one on *August 2. 1651.* been less considerable in its portents. Let any man but consult the Histories of these late times, and compare them with any equal portion of History selected out of former ages, and tell us, whether the acts of the most prodigious and remarkable times and ages have surpassed those of ours.

But it is not onely in generals, but particulars, that Eclipses have effects: Private Persons, as well as Publick States, are concerned therein. I could give instance in divers Nativities, but one especially, which is most eminently observable, *viz* That of *Carolus Gustave*, the late King of *Sweden*; in my Calculation of which, by consulting the great, and (to him) terrible Eclipse of the Sun, which happened on *Nov. 4. 1650.* in the radical place of *Sol.*, and opposite place of *Luna* in his Geniture, I predicted his death exactly, and this a year and half before it happened. But may some say, *One swallow makes no summer*; and will therefore expect other examples for the further confirmation hereof. But many instances would take up much room; and I not intending a Volume here, shall refer the ingenious that affect variety of proof, to my intended book of Genitures, which I have so oft promised to the world, and purpose shortly to make good: In which Treatise, I shall (God permitting) insert examples of sufficiency to satisfy the most curious, if satisfiable.

Let

The State of the Year predicted.

Let this therefore that hath been said, serve in the interim to prove that Eclipses have great and remarkable significations; and that they are more eminently considerable then the black fac'd night, or any gloomy day. That the astonishment and terrour they have brought upon men in all ages, and the great effects that have concomitated them, as well in particular Radixes, as upon Countries, Governments, Families, &c. ought to engage us to a more wary and serious observation of their Motions and Portents: for, as Astronomy teacheth us to discover the true quantity of the Defects, so Astrology instructeth us how to predict the true quality and natures of their Effects. And so I am come to the significations of this particular Eclipse; which I shall briefly examine.

It is the opinion of the Learned *Messahal* 1, Cap. 7. de Eclips. -- *Eclipsis Solis cum fuerit in Ariete, significabit interitum Divinum, & fecitatem, sive terre sterilitatem, atq. famem*: An Eclipse of the Sun in Aries, hath signification of much damage and prejudice to rich persons, of barrenness and dryness of the earth, and thence a famine. We poor English have had our share of misery of all sorts, and that to purpose: 'tis time for us now to be at quiet. Oh, that the destroying Angel were once departed from our Tabernacles! Our former never-to-be-forgotten miseries are sufficient to teach us lessons of moderation!

*Sed nost jacturam quis non sapit? utile non est,
Consilium post facta dari, quod oportuit ante;
Consilium post facta, imber post tempora frugum.*

*Who isn't that after loss, becomes not wise?
We should not after, but before advise:*

*All by-past Counsel's idle, and as vain,
As when the fruit's ripe, is a shewre of rain.*

The Learned *Cardan*, Sec. 2. A. h. 17. bids us, *Considerare oportet tempore Eclipsis vires Planetæ dominantis; nam non Eclipsis, sed illius significatio apparebit*: To consider the force and strength of that Planet who governs the place eclipsed; for the significations of him, not of the Eclipse onely, shall be made manifest. Now, if you would know who that Planet is, the Eclipse falling in Aries, it is Mars; and what he portends, let the Learned *Escuid* tell us: *Et relata est significatio Martis ad bella, & ad guerras, & ad victorias & consimilia, quæ sunt quasi signa rerum, & signa quæ significant dissolutionem eorum, &c.*

Now

The State of the Year predicted.

Now as Mars Lord of the place eclipsed, is in Pisces, *Joh. Ant. Giff. de Eclipsib. fol. 117. saith, ... Accident, sive bonum sive malum, erit in genere piscium, & in animalibus flumium, & fontium, & erit etiam accident super homines, &c.* The accidents that Mars presage, you have heard already, are not good; and if they chiefly fall upon all kinds of Creatures in the Sea, Rivers and Fountains, &c. men cannot in some measure escape tasting thereof.

*But all works strongly towards that misery
Poor Europe's threatened with in sixty three.*

To know when the effects of this Eclipse first begin to shew themselves, I subtract the time of Sun rising, March 10. viz. 5 h. 40 m. from the middle of the defect, viz. 9 h. 37 m. and the distance in time is 3 h. 57 m. and then I say, As the length of the day, viz. 12 h. 40 m. or 760 m. is to 365 days, so the Interval, or distance betwixt the Sun rising, and middle of the Eclipse, viz. 3 h. 57 m. or 147 m. is to 72 days, *scilicet*.

Demonstratio.

| | |
|---|----------|
| Length of day, 12 h. 40 m. or 760 m. | 2,88081. |
| 365 days | 2,55229. |
| Interval, 3 h. 57 m. or 147 m. | 2,17731. |
| The sum | 4,73960. |
| Ere the effects begin, 72 days, <i>scilicet</i> | 1,85679. |

which initiates on the second day of June following.

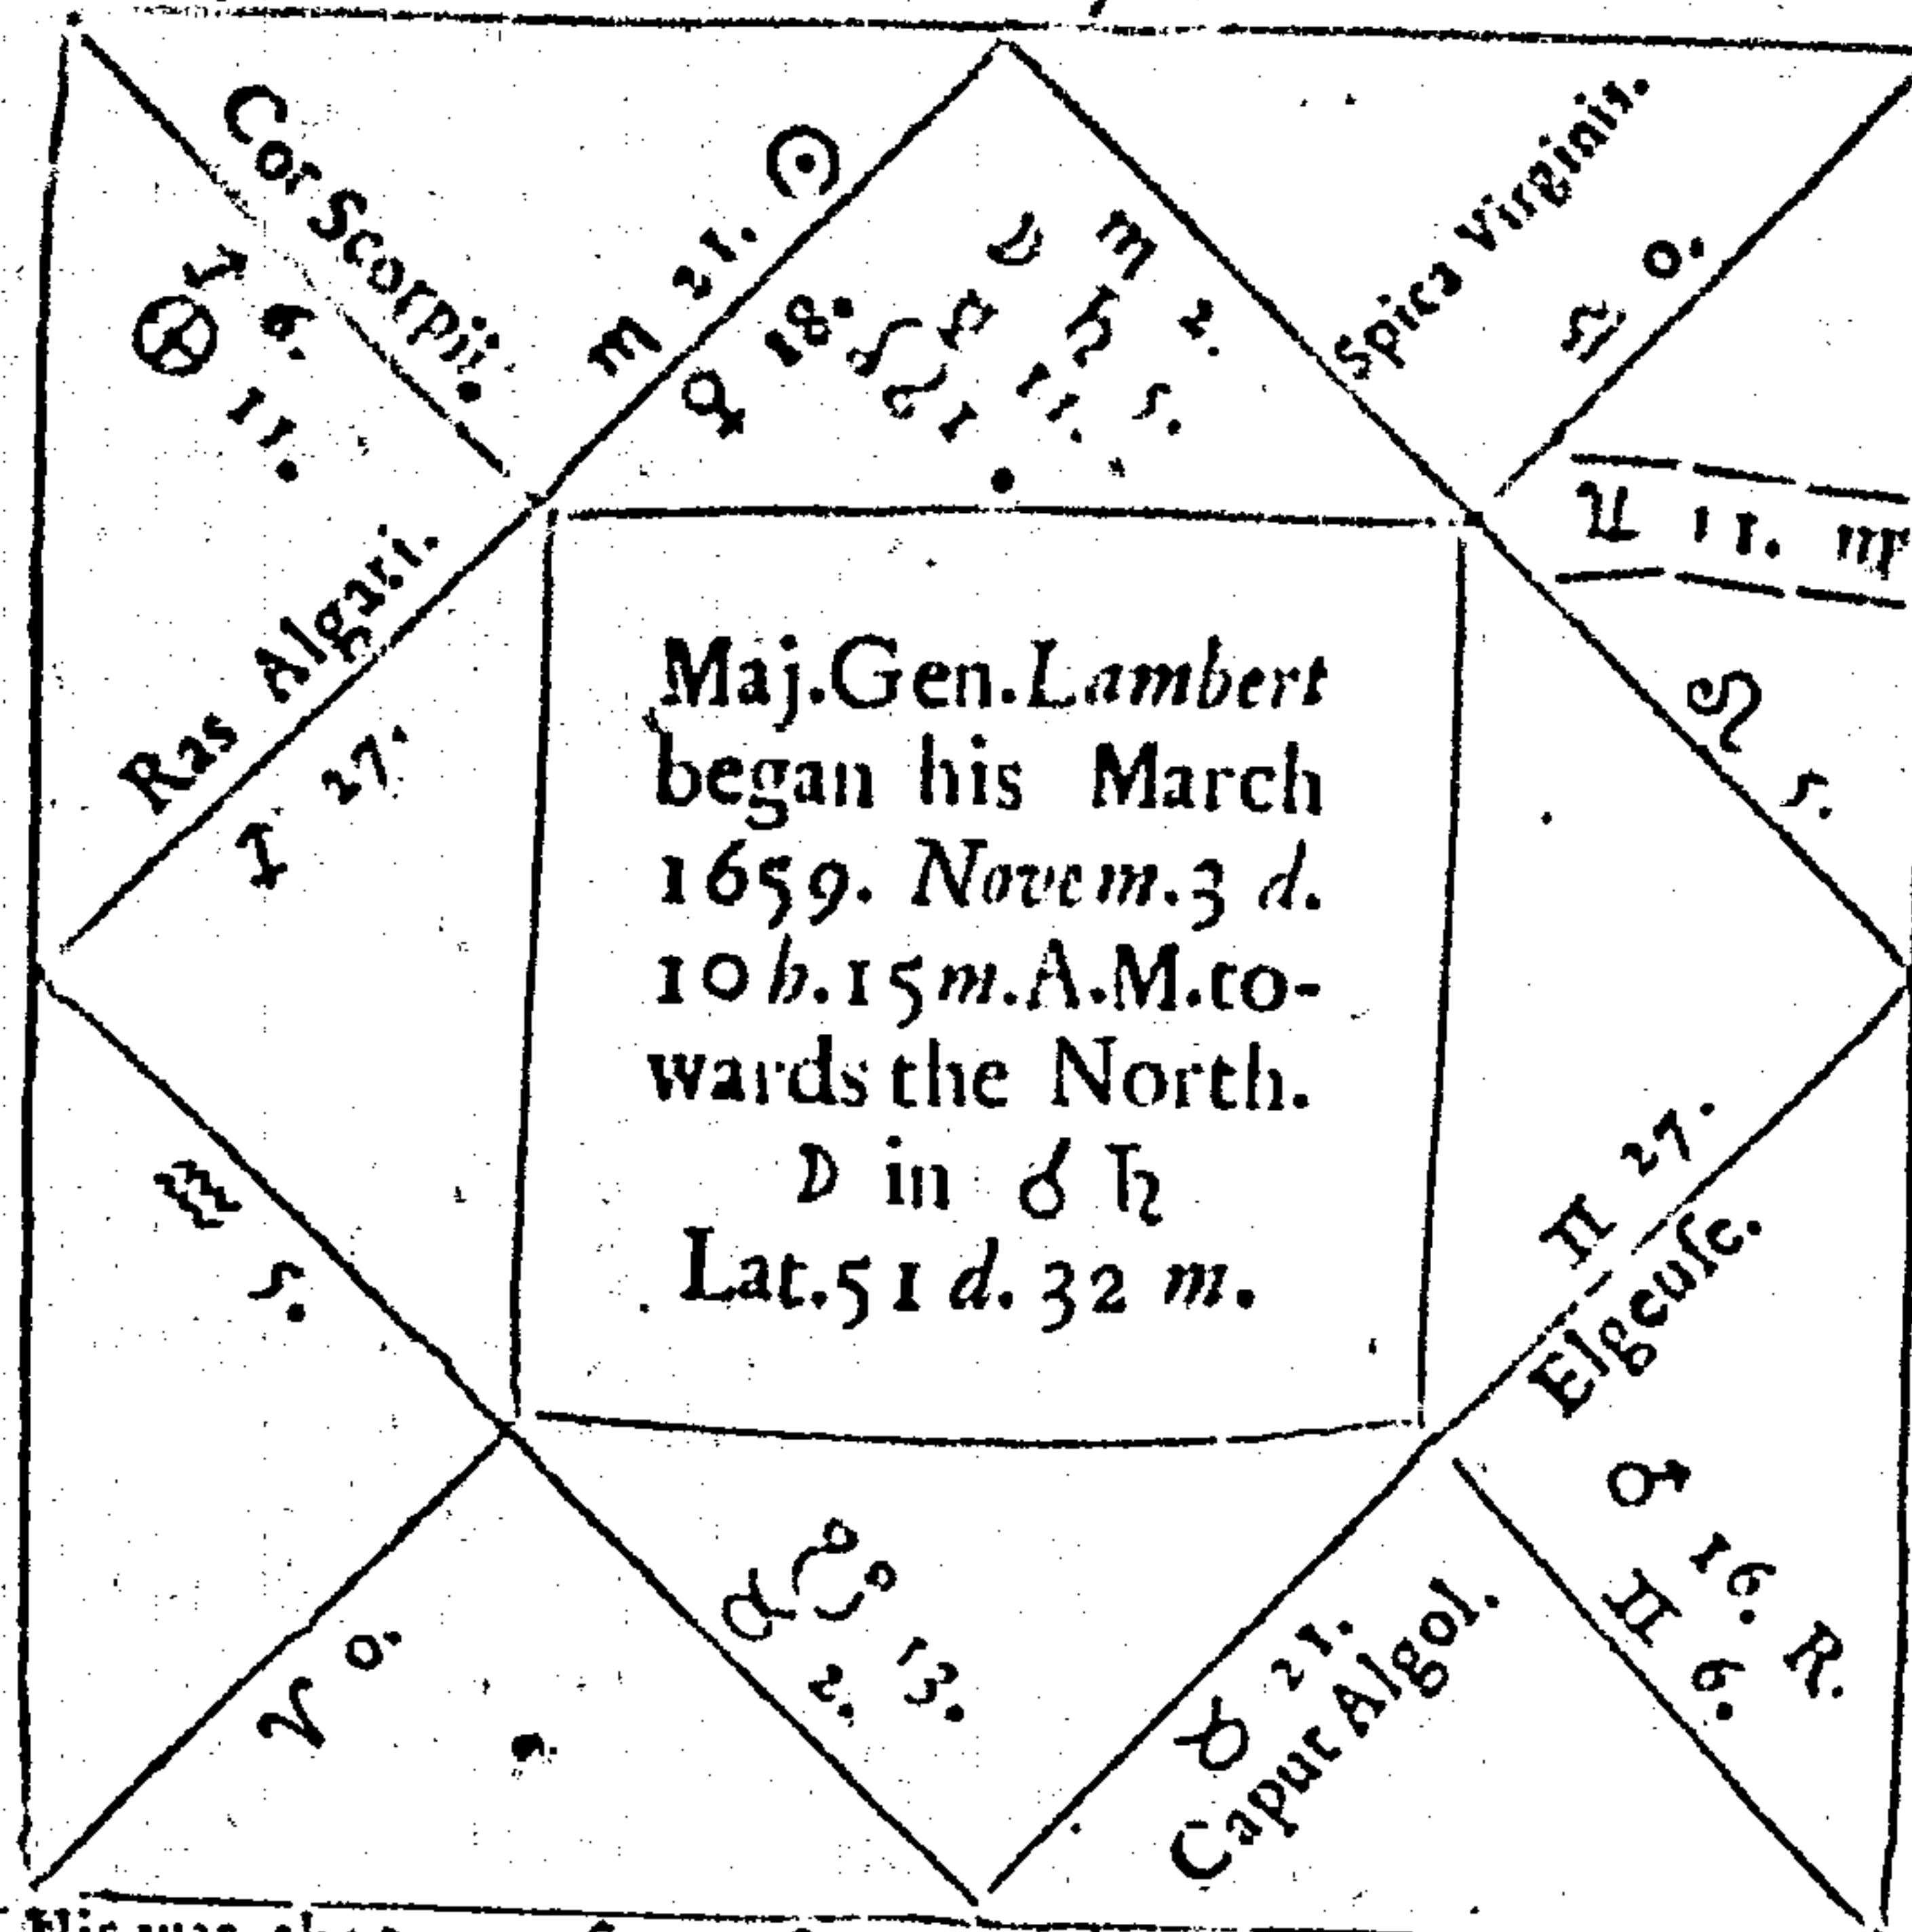

The second will be an Eclipse of the Moon upon Thursday, April 4. between three and four in the afternoon; at which time, about a fourth part of the Moons body shall be darkned, by her south part passing through the earths Conical shadow; but not to be seen of us, because the Meridian thereof is removed so far to the East: but it will be visible to those in East India, in Java the great and less, and in the Oriental Kingdoms of Bengala.

The third will be a terrible Eclipse of the Sun on Saturday September 13. and although it be near noon in our day time, will not be conspicuous to us, in regard the Moon hath then so much South Latitude, viz. near a degree; which being augmented by her Parallax, doth far exceed the sum of the two Semi-diameters; but to those that live in the South Africa, the Islands of St. Thomas, and in the neighbouring parts of the Southern Land yet unknown to us, the Sun will appear almost totally darkned.

The

The State of the Year predicted.

The last will be a visible Eclipse of the Moon, on Saturday, Septemb^r 8. near three a clock in the morning: the Digits eclipsed will be 7 of 12. This defect is celebrated in the second Decanate of Aries: which, according to Proclus, portends—A general mortality in most Diseases. but happening so near the Winter, its effects may probably be anticipated until the next Spring. And thus much shall serve for the Judgements of Eclipses, and also for the whole year.

This was the true posture of Heaven, at what time Major General Lambert put his foot in the Stirrup to march toward the North, to meet the Valiant Lord General Monk, then advancing out of Scotland towards London; and a most sad Position it is, and exactly agrees with that Major General's success he had by that unfortunate undertaking. As the Moon is in a Wat'y Signe, in exact Conjunction of Saturn, the cruellest and unfortunate of Planets, he had like to have been drowned in Yorkshire, riding through a River toward his Army; where his Horse left him to the mercy of the most merciless of Enemies, the Water; from whence he with much ado, escap'd. Thus was his beginning ominous. *Hermes Trismegistus, Cent. Aphorif. 29. adviseth, — In exitu*

conjunctionem ad pugnam — Sit ascendens domus Superlunum Planetarum, vel ☉ & sit tam ipse quam domus eum fortis: Dominum vero Septima debilis, & impediatur a malis: (i.e.) When any one goeth to war — let the Horoscope be a Signe belonging to the Superiour Planets, or the Sun; and let the Ascendent and his Lord be strongly fortified: but debilitate the Lord of the seventh as much as you can, and let him also be hindered by the body or malicious Rays of the Infortunies. This grandam Victoriam Perses, had not the good hap to set forth upon a time suitable to this Direction of Hermes: but on the contrary, at such a time when the Lord of the Ascendent was not only in detriment, and in the eighth house, the most obscure place of the Heavens, but was in ☉ also, the natural significator and grand Patron of War.

The Learned Guide Bonetus, fol. 459. saith, — *Is qui se facit fortis in bello, intendit obtinere victoriam super hunc Adversarij, et magis debet esse in fine domus Martis ascendens, et Mars in bona Aspectu of the Moon, Ascendent, or the Lord thereof. But in this Figure, there was no such thing: Ergo, it could not be expected otherwise, then that he should be worsted, and come off with loss in that undertaking: Chiefly, in that the Lord of the Ascendent is Cadent, and the Lord of the seventh Angular, in domo Martis.*

There are divers eminent Persons in London that have heard me relate the misfortune that happened upon that Expedition, long before the conclusion thereof; even as soon as the March it self was begun. And indeed, had I considered nothing but the Moon her Conjunction of Saturn in decima domo, and Cauda Draconis in the fourth, together with the Angularity of Mercury, and ill Location of Jupiter, it had been easie to have pronounced (as then I did) *no great felicity or pleasure in the beginning of that undertaking; and nothing but bitterness in its end.*

It was very plain, by the foregoing Figure, there should not be any dangerous fight, because the Lord of the Ascendent and seventh house were in Sextile. *Haly de judic. Astror. says — Sed si duorum significatorum unus applicuerit, alteri de Sextili vel Tertio, habebunt pacem & convenientiam antequam ad manus veniant.* And every man (that knows any thing) knows, that the Controversie ended in a Treaty: and thrice happy was it for England that it thus fell out.

Should any enquire into the reason of this Major General's coming off peaceably, and without any questioning, in that designe, (for so he did, though he was therein unsuccessful) it is eminently considerable, that the Lord of the tenth applies ad Dom. Ascendentis, doubly; 1. As he is a lighter Planet; 2. As he is Retrograde; and the Learned Haly says, fol. 85. — *Si dominus Medii Caeli applicuerit domo no Ascendentis, juvabit eum liberè, & sine petitione.* All England remembers, that while this (then) eminent Person was in the North with his Army, the Parliament at London voted him Indemnity, without the least request or desire from him; but freely of their own accord; being (it seems) willing to obleviate his present failings, and force committed upon them, and indulge him a free pardon, in compensation of his former Adventures on their parts. This very example may be of good use, and serve to instruct others, — That it is ill to strive against the stream; and that no man can thrive by fighting against the Fates; beginnings are always deemed ominous.

*Raras Principii est exitus bonus mali:
Things ill begun, do seldom come to good.*

The great Philosopher absolutely avers, 'Adversus' and
Lib. 5. cap. 1. It is impossible (saith he) that that which is first
the first, should prove it at the last. It is most conspicuously true
this: for how many hundreds have been sharers in this unfortunate
Gentleman's sufferings? How many both in England and Scotland,
in Ireland also, have been cashiered their employments, by their
successful Zeal to him, in espousing his Interest? and all, in not really
perceiving the depth of that undertaking; or knowing unto what
But the Arrow of that designe would be directed. 'Tis an old Adage
*Sapient debet incipere a fine; A wise man should always take his beginning
from the end of his business;* and then he may be sure to prosper.

And now, my Book, farewell; go, take thy flight:
What though thy Author be, nor Lord, or Knight?
Heav'n is thy Patroness; she'll thee prefer,
To be to Some, a Privy-Counsellor.
Thou art Urania's Agent! Let success,
Thy Mature Message, Various Voyage, Bless.
A Spotless Errand, who would not declare?
That Soldier's honour'd, Truth's bright Shield doth bear!
Haste then, about thy Charge! make no delay:
Confront in Quickness, th' Usher of the Day.
Make all rejoice! tell them, the times do mend;
And Black Confusion's brought, near to ———

The famous Pedoral Lozanges, which cure Coughs, Consumptions, Rickets, and all Diseases of the Lungs: as likewise the universal Chemical Powder, so excellent for Agues, Gouts, causing sweat, and te
&c. are both to be sold, with a Book of Direction for the use of them
by the Authour, Edw. Maynard, at an Apothecaries shop in White
cross-street, and Henry Eversden at the Grey-hound in St. Pauls Church
yard.

The Discourse of Sigils, Lamens, Spirits, the Chrystal, Prophecies, &c.
which I promised in my last years Almanack to print in this, I found
too large for such a scantling of Paper to contain; and have therefore
added it unto my Treatise of Prodigies lately published, and to be
sold by Francis Cossinet at the Anchor and Mariner in Tower-street, and
Thomas Bassett in St. Dunstons Church-yard.

The Idea of the Law, Government and Tyranny: by John Heyden
Esq; Sold by the said Thomas Bassett.

The Rosie Crucian infallible Axiomata, written by the same Author
to be sold by the Booksellers in St. Pauls Church-yard.

The Natural Curiousities of each particuler shire in England, with
Philosophical Reflections upon them, written shortly to be published
by Mr. Joshua Childrey, M. A. and Chaplain to the Right Honourable
the Lord Herbert.

The Art of Astrologie, in all the Parts thereof, is taught by the Au
thor of this Book.

From my house without Temple-
Bar, near Strand bridge.
